Bob ---------- Forwarded by Bob Chandler/ET&S/Enron on 06/26/2000 10:06 AM ---------- From: Daren J Farmer 06/26/2000 09:56 AM To: Bob Chandler/ET&S/Enron@ENRON cc: Subject: Meter 8740 I have one more ticket - and they have not settled. DTypically, condoms are in the form of individual condoms, which are individually placed on a male member. Such individual condoms are usually rolled on the surface of the penis and unrolled and placed in position. When a roll of individual condoms is run out, new rolls must be purchased, and the condoms unrolled from the old rolls must be individually placed in position to be individually used. That process is often slow, particularly when a low count roll of condoms is used. Additionally, these individual condoms have a tendency to slide off, and on, and off, and on, the penis during use. An attempt to prevent this by using a ring or band of plastic material such as vinyl 1cdb36666d

%PDF-1. IEC 15438:2006).pdf 27 ėŁ IEC 15438:2006).pdfQ: Rows and columns have a different size Trying to create a simple app with a few basic UI elements. The problem is that the content of the rows are not aligned correctly - they are not the same size. I read somewhere that the Gtk css says that the rows should have a width of 100%. There is some css which says that: Column { padding-top: 24px; padding-bottom: 24px; spacing: 24px; } This is true - rows have about the same size. But the spacing between rows is not the same as between the columns and the boxes. So there is some other solution? I need the rows to be the same size. The boxes to be the same size. The columns not to be a lot smaller than the boxes. Also the horizontal spacing between columns is important. I have a feeling this has something to do with the padding on the grid containers. But how do I put this in css? Here is the snippet of code in question: In MainWindow.h: class MainWindow: public QMainWindow { private: Ui::MainWindow *ui; public: //... MainWindow(QWidget *parent = 0); }; In MainWindow.cpp: MainWindow::MainWindow(QWidget *parent) : QMainWindow(parent), ui(new Ui::MainWindow) { ui->setupUi(this); setWindowTitle(tr("Example - program title")); } MainWindow::~MainWindow() { delete ui; } In MainWindow.ui: grid { columns: 2; } Ui::MainWindow { width: 450px; height: 500px; } A: I found out that in the css file where I commented out the width of the grid the spacing between rows and between columns is the same as in the css file I commented out the width of the rows
