It's easy to connect Photoshop to your bank account, to the cloud, to the IRS, and through your Amazon and Netflix accounts, and so on. It knows where you are, what you're doing, what you're wearing, what books you read, and much more. A picture's worth a thousand words, yes. But it's also worth a lot of money. If you sell or share copyrighted images, you need a safe way to do so. The programs that Adobe bundled with its products enabled it to link your account with the company's, a privilege you don't have with Apple Imports. This is a big deal. A lot of people got their pictures taken by someone else. Photoshop enabled sale of those images. I've shot a lot of photos on my iPhone. I've shot some wonderful images on my iPad Pro, too, for reasons that are very easy to understand. Indeed, some great photographs have been taken on the iPad Pro, which makes sense, since the device normally sits in a back pocket or on a desk or in a bag along with 3 to 4 pounds of other things while one is out and about in daily life. I've also worked on images on my Mac desktop, and have seen very clear and sharp images taken on those devices. The software tools available to me on all these platforms are limited, which is a bit frustrating as they come so close to matching the image quality available through a digital SLR. One factor that made me take to an iPad Pro probably more than any other, however, was its excellent iOS 11 software. I realize that tablets of this generation often lag behind in terms of operating system functionality. That's not so with the iPad Pro, which is all but superlative in this area. I use the device as my only computer for email using the powerful **Mail** app. I use the excellent **Notes** app for taking notes, and I use **Safari** for web browsing, although I'll be glad when Apple makes a version of its web browser that looks and works better. I use the **Files** app for file management, including adding and categorizing files on my Dropbox account, which I then import into other apps, including Adobe Photoshop and Lightroom.
